

Kevin Beideman

Rockledge, PA, 19046 | 215-668-4122 | kevinbeideman17@gmail.com | <https://kbeideman.neocities.org>

PROFESSIONAL SUMMARY

A Cybersecurity M.S. Candidate and Computer Science & Information Technology graduate focused on enterprise security and developing offensive and defensive cybersecurity skills. Adaptable, quick to learn, and experienced in applying technical concepts through hands-on labs, software projects, and cybersecurity research.

EDUCATION

La Salle University

Graduate: Cybersecurity (GPA 4.0/4.0)

Majors: Computer Science and Information Technology (GPA 3.72/4.0)

Minor: Mathematics

Philadelphia, PA

M.S.: Anticipated May '27

B.S.: Graduated May '26

TECHNICAL SKILLS

Active Directory, AD DS, DNS, DHCP, Group Policy, SMB/NTFS, VMware Workstation Pro, PowerShell, Windows Security Auditing, Kerberos, Nmap, Wireshark, TCP/IP, Python, Java, C++, SQL, HTML/CSS/JavaScript, Git

PROJECTS

Enterprise Active Directory Security Lab – August 2026

- Built and secured a Windows Server 2022 Active Directory lab with a domain-joined Windows 11 client; configured AD DNS, DNS, Group Policy, AGDLP, and SMB/NTFS role-based access
- Implemented Windows security auditing and PowerShell logging; analyzed authentication, identity-change, and process telemetry and hardened password, firewall, and SMB configurations

LRG – Team Composition Web Tool – June 2026

- Built and deployed a JavaScript web tool for team composition planning with map selection, player slots, saved compositions, persistent settings, and downloadable screenshots

EXPERIENCE

La Salle University AI and Security Researcher

May 2024 – October 2025

- Researched generative AI tools, including ChatGPT and Gemini, and analyzed their implications for information security, ethical hacking education, social engineering, and automation
- Published researched paper titled: Y.Wang, K. Beideman, M.McCoey, and M. Jalalitar, “*Empowering Ethical Hacking Education with Generative AIs: A ChatGPT-Infused Curriculum*,” in the Proceedings of the 2025 IEEE Integrated STEM Education Conference. p.1–7

TCBMe Foundation Research Staff Member

May 2024 – October 2025

- Contributed to a \$10,000 dollar research initiative focused on gamification and youth mental-health applications, researching and developing AI-assisted features with Python and JavaScript to support project implementation
- Built and tested interactive form-based applications while evaluating data-handling and security considerations

Inn Dwelling Mathematics Instructor

July 2023 – June 2026

- Tutored students in Pre-Algebra through Calculus through individualized and group instruction

MSBT Dietary Aide

March 2023 - Present

- Supported daily food service and retreat operations in a fast-paced environment

La Salle Computer Programming Team Treasurer

September 2022 – May 2026

- Solved programming problems using Java, Python, and C++ while supporting team organization, mentoring, and competitive programming preparation
- Competed in 6 programming competitions and placed 1st at ICPC NA Qualifiers 2026 Division 2
